

Tests That Can Help Save Your Life

4 Tests in Less Than 1 Hour

Stroke is America's third leading killer. It is also the #1 cause for nursing home admissions. Unfortunately, half of all stroke victims have no warning signs before a stroke occurs.

We'll be in Your Neighborhood!

Where: HUS Presbyterian Church - Cedar Rapids

When: Tuesday, January 30, 2007

Pre-registration is required. Call 1-800-324-1851

Life Line Screening is America's leading provider of quality health screenings. These tests quickly detect arterial abnormalities which can cause disrupted blood flow. Our screenings are fast, accurate, and available at an affordable rate.

We provide these non-invasive, completely painless screenings using Doppler ultrasound technology.

1 Stroke Screening/ Carotid Artery

This screens the carotid arteries in the neck for plaque buildup. The #1 cause of stroke is linked to carotid artery blockage.

2 Abdominal Aortic Aneurysm Screening

This screens for the existence of an aneurysm in the abdominal aorta. The vast majority of people who have an aneurysm have no symptoms.

Complete details on reverse side.

3 Peripheral Arterial Disease Screening

This screens for peripheral arterial disease (plaque buildup) in the lower extremities which is linked to coronary artery disease.

Also... Identify your risk for osteoporosis in just 60 seconds

“How can I thank you for my life? I had NO previous symptoms to indicate such a problem.”

Judith Hanlon,
Wayland, MI

Tests That Can Save Your Life

1. Stroke Screening/Carotid Artery

Plaque buildup (also known as arteriosclerosis) is an abnormal collection of calcium and cholesterol on the artery walls. As you can see in the image at left, plaque builds up along the walls of a diseased artery. This buildup can restrict blood flow to the brain or break off and become lodged in a blood vessel – causing a stroke.

Through ultrasound technology, Life Line Screening can visualize the inside of your carotid arteries. Early detection allows your personal physician to advise you on an appropriate course of action that could be life saving.

2. Abdominal Aortic Aneurysm (AAA) Screening

An Abdominal Aortic Aneurysm (AAA) is a “ballooning” of the wall in the abdominal aorta. Like strokes, AAAs are most often caused by atherosclerosis (plaque buildup). The majority of people with AAAs have no symptoms. If an AAA ruptures, the mortality rate is as high as 80 percent, with many not surviving long enough to reach a hospital.

More than 15,000 U.S. residents per year die of AAAs. The good news is that AAAs can be identified in minutes via a painless, non-invasive ultrasound screening.

3. Peripheral Arterial Disease (PAD) Screening

Ultrasound technology is also used to screen for Peripheral Arterial Disease (plaque buildup in the arms/legs). Eight to twelve million Americans suffer from PAD.

4. Osteoporosis Screening

Ultrasound screen for abnormal bone mass density in men and women. Osteoporosis is painless and silent in its early stages.

**Complete Wellness Package (all 4 screenings)
only \$129. Save \$41!**

You will receive your results in 21 days. Screenings in Kansas are performed by Life Line Screening of America, LLC on behalf of Life Line Screening Physicians, P.A.

Insurance Note: At the present time, Medicare does not cover the cost of these screening services. Life Line Screening does not file insurance claims.
